Fall Course Deliverables

ENEL 500 - Capstone

Hamid Zareipour
Professor, P.Eng., Ph.D., FIEEE
Department of Electrical and Software Engineering

2024 - 2025

UNIVERSITY OF CALGARY

DELIVERABLES

Component	Submission Type	Learning Outcomes	Weight
Initial Project Proposal		1	Pass/Fail
TA Kick-off Meeting		4, 5, 6	Pass/Fail
Finalized Project Proposal	Team	1	2%
Team Contracts		4	3%
Project Information (Google Form) *includes finalizing your academic advisor	Team	5	Pass/Fail
Team Affiliation (Google Form)	Individual	5	Pass/Fail
Cover Page PDFs to Dropbox	Team	5	Pass/Fail
Design Roadmap Document		1 - 7	16%
Fall Term Progress Evaluation		5	7%
Academic Advisor Technical Evaluation		1 – 7	7%
Industry Rep Technical Evaluation		1 - 7	7%
Peer Evaluation	Individual	4	Pass/Fail

Total: 42%

UNIVERSITY OF CALGARY

INITIAL PROJECT PROPOSAL

Criteria

- Define the problem and solution clearly and specifically
- Avoidance of jargon and undefined technical terms
  - Understandable for non-experts
- Absence of grammatical errors and typos
- Presence of a strong **design** component
- Emphasis on collaboration and effective **teamwork**
- Incorporation of strong **project management** practices

Submission Details

- One per team
- Submit through D2L
- Use provided Excel template

After Submission

- Instructor and TAs will review the proposals
- TAs will be assigned to projects
- D2L groups for each project will be created
- Initial feedback will be posted on D2L
- Teams and TAs arrange kick-off meeting

UNIVERSITY OF CALGARY

TA KICK-OFF MEETING

Objectives

- Meet and greet with your TA
- Review the project proposal
- Discuss initial feedback on the proposal
- Clarify any questions or issues

Scheduling

- TA will initiate the scheduling process
  - Will send out an email with time slots
- Teams are responsible for collaborating with their assigned TA to schedule this meeting

UNIVERSITY OF CALGARY

FINAL PROJECT PROPOSAL

- Teams are required to submit the final project proposal Excel template on D2L by the deadline
- Marks will be posted the following week
- Projects will be considered approved/finalized

- Proposals will be evaluated based on:
  - Clarity
  - Completion of all sections
  - Consideration of provided feedback in the final submission
  - The design component must be clear.
- Student-sponsor contract must be complete and signed by this deadline

UNIVERSITY OF CALGARY

TEAM CONTRACT

- Ensure commitment and accountability among all team members for project delivery
- Each team member must sign the internal contract
  - Specify the expectations and consequences for failing to meet them
- Utilize the provided templates to customize and outline team members' shared views on collaborative work
  - General Team Contract Template
  - Sponsor-Team Contract
  - Contract Examples
  - Rubric

UNIVERSITY OF CALGARY

COVER PAGE PDF

To make some of the logistics work with D2L, teams need to upload the **Project Identification cover page** PDF to the D2L Dropbox folders as directed

- One page PDF
- Multiple submissions
  - Submit to all the Dropbox folders that begin with “PDF Cover”
- Will make it possible to populate team marks to all members (how? It is a long story :))

Cover Page Requirements

- Project title
- Team number
- Name, email, UCID of the project manager at the time
- Name and UCID for the rest of the team members
- Name of the support technician if applicable
- Name of the academic advisor
- Name of the sponsoring company
- Name and email of the sponsor representative

UNIVERSITY OF CALGARY

DESIGN REVIEW MEETING

Objectives

- Consult with the sponsor and technical academic advisor on project scope and deliverables
  - Schedule multiple meetings if needed
  - Hold separate meetings for sponsor and academic advisor
- Necessary to ensure the sponsor and advisor are on board with the team's plans
  - To avoid issues during the fall term evaluation

Notes

- Two crucial times to have the review meeting
  - One meeting **before** the Design Roadmap Document deadline
  - Another meeting **before** the Fall Progress Evaluation deadline
- Project manager must arrange the meetings
- Meeting format is up to the team
- Meetings are not explicitly graded, but engaging with the sponsor and advisor will be part of the evaluation criteria

UNIVERSITY OF CALGARY

DESIGN ROADMAP DOCUMENT

Objectives

- Define and formalize project scope and deliverables
- Explore various technical solutions and methodologies
- Identify team's preferred solution for project objectives
- Outline initial strategies for implementing the design solution
- Serve as a project roadmap, subject to evolving technical decisions

- Click here for full instructions on this report
  - Design Roadmap Instructions

TA ROADMAP REVIEW - OPTIONAL

Objectives

- Discuss feedback and mark provided by TA on design roadmap document
- Either team or TA may initiate the meeting if they feel it is needed
  - If meeting is conducted, must be completed before team's fall term evaluation session

UNIVERSITY OF CALGARY

FALL PROGRESS EVALUATION

Meeting Logistics

- Attendees
  - TA, advisor(s), sponsor representative, all team members
- Evaluation Process
  - Evaluations conducted by TA, advisor, sponsor rep using provided forms from the TA
- Separate Meetings
  - Arrange if unable to meet with all advisors; TA must attend all meetings
- Responsibility
  - Project Manager arranges the meeting
  - TA: chairs the session, distributes the rubric, and collects the completed rubric forms from the sponsor rep and advisor at the end of the evaluation session.

Objectives

- Clarify, explain, and justify design decisions
- Discuss logistical plans for project execution
- Update on implementation progress

Meeting Schedule

- Set a 1-hour meeting for detailed low-level design review
- Possible attendance by course coordinator based on team progress

UNIVERSITY OF CALGARY

FALL PROGRESS EVALUATION

Presentation Content

- No longer than 25 minutes
  - Will have plenty of time for Q&A and discussions
- Demonstrate progress and design decisions
- Report on execution of design plans, material ordering, preparing blueprints, etc.
- Show progress in actual implementation of the project
- Outline upcoming plans
- Address technical and project management challenges
  - Get feedback from advisor and TA

Note: Software Projects

- Team will provide outcome of the **first** sprint review
  - Outcome of the sprint defined at the start, the evaluation, and your plan to solve and refine possible issues
- Evaluated on achieving sprint goals and progress toward final product
- Provide the outcome of your second sprint planning
  - Including your goals for this sprint, exact outcome, evaluation criteria, technical specifications and materials tools, cost estimation, and alternative solutions to your designs in each sprint

UNIVERSITY OF CALGARY

FALL PROGRESS EVALUATION

Rubric

- Click the following link to view the evaluation forms
  - Evaluation forms

Follow-Up Process

- Teams **scoring 75% or lower by any evaluator** must follow a designated follow-up process
- Click the following link to view the required follow up process
  - Follow-Up Processes

PEER EVALUATION

Conducting Peer Evaluations

- Two peer evaluations in the course
  - Fall term: feedback only, no grade impact
  - Winter term: average numerical score used as the percentage grade
- **All students must complete both evaluations**
- Conducted through ITP Metrics
- Focus on professional qualities, not personal issues
- Each team member evaluates others and self on:
  - Communication with team members
  - Knowledge, skills, and abilities
  - Commitment to the team's work
  - Emphasizing high standards
  - Keeping the team on track

Proficiency Evaluation

- Subjective criteria
  - Outstanding (5)
  - Strong (4)
  - Moderate (3)
  - Bare minimum (2)
  - Unsatisfactory (1)
- Member will also receive written feedback
- System will assign an overall numerical average grade
  - Students with an average **score below 4 must follow up**
  - Follow-Up Processes
