Winter Course Deliverables

ENEL 500 - Capstone

Hamid Zareipour
Professor, P.Eng., Ph.D., FIEEE
Department of Electrical and Software Engineering

2024 - 2025

UNIVERSITY OF CALGARY

DELIVERABLES

Component	Submission Type	Learning Outcomes	Weight
Winter Term Progress Evaluation		1 - 7	3%
Academic Advisor Winter Evaluation		1 – 7	3%
Industry Rep Winter Evaluation		1 - 7	3%
Final Project Description (Google Form)	Team	5	Pass/Fail
Project Demonstration and Final Presentation	Team	1 - 7	10%
Academic Advisor Final Evaluation		1 - 7	10%
Industry Rep Final Evaluation		1 - 7	10%
Design Fair Poster and Showcasing		5	Pass/Fail
Final Report		1 – 7	7%
Peer Evaluation 2	Individual	4	12%

Total: 58%

UNIVERSITY OF CALGARY

WINTER PROGRESS EVALUATION

Meeting Logistics

- Attendees
  - TA, advisor(s), sponsor representative, all team members
- Evaluation Process
  - Evaluations conducted by TA, advisor, sponsor rep using provided forms from the TA
- Separate Meetings
  - Arrange if unable to meet with all advisors; TA must attend all meetings
- Responsibility
  - Project Manager arranges the meeting

Objectives

- Discuss and evaluate the team's progress towards project completion
  - Significant and tangible progress in solution implementation is expected

Meeting Schedule

- Set a 1-hour meeting for detailed low-level design review
- Possible attendance by course coordinator based on team progress

UNIVERSITY OF CALGARY

WINTER PROGRESS EVALUATION

Presentation Content

- No longer than 25 minutes
  - Will have plenty of time for Q&A and discussions
- Demonstrate tangible progress towards project deliverables
- Engage all team members in questions and answers
- Address technical and project management challenges
  - Get feedback from advisor and TA

Note: Software Projects

- Team will provide outcome of the **second** sprint review
  - Outcome of the sprint defined at the start, the evaluation, and your plan to solve and refine possible issues
- Evaluated on achieving sprint goals and progress toward final product
- Provide the outcome of your third sprint planning
  - Including your goals for this sprint, exact outcome, evaluation criteria, technical specifications and materials tools, cost estimation, and alternative solutions to your designs in each sprint

PROJECT DEMO & FINAL PRESENTATION

Meeting Logistics

- Attendees
  - TA, advisor(s), sponsor representative, all team members
- Evaluation Process
  - Evaluations conducted by TA, advisor, sponsor rep using provided forms from the TA
- Separate Meetings
  - Arrange if unable to meet with all advisors; TA must attend all meetings
- Responsibility
  - Project Manager arranges the meeting

Objectives

- Discuss and evaluate the team's progress towards project completion
  - Significant and tangible progress in solution implementation is expected

Meeting Schedule

- Set a 1-hour meeting for detailed low-level design review
- Possible attendance by course coordinator based on team progress

UNIVERSITY OF CALGARY

PROJECT DEMO & FINAL PRESENTATION

Presentation Content

- First final presentation, then demo
- No longer than **20 minutes** for final presentation
  - Rest is for the demo and Q&A time
- May include the demo inside your presentation if you prefer
  - Make it clear with your TA that the presentation may be longer than 20 mins

Note: Software Projects

- Team will provide outcome of the **third** sprint review
  - Outcome of the sprint defined at the start, the evaluation, and your plan to solve and refine possible issues
- Evaluated on achieving sprint goals and progress toward final product

UNIVERSITY OF CALGARY

PROJECT DEMO & FINAL PRESENTATION

Key Presentation Points

- Original Product Scope
  - *As defined in the Fall term*
- Original Project Deliverables
  - *As per the Fall term report (what you promised to do)*
- Original Technical Specifications
  - *As defined in the Fall term*
- Project Accomplishments
  - *What you actually did*
  - Product Scope
  - Delivered Items
  - Final Technical Specifications
- Measures of success and validation tests results
- Deviations from the original goals and why
  - *With respect to design/objectives/deliverables/technical specifications, etc.*
- How the team built and maintained a logbook
- You may choose to include other relevant information in your presentation as you find it important.

DESIGN FAIR POSTER & SHOWCASING

Guidelines

- At least one student must always be present at the booth
- Poster Requirements:
  - Must include motivations, the problem, the solution, and some results
  - May add any other information
  - Include names of team members, sponsoring company, and academic advisor
  - Include the Schulich School of Engineering logo
- Any format is acceptable as long as size restrictions specified by the school are followed
- No specific template is required
- Three judges will evaluate your project. See the rubric here
- Dress Code:
  - Formal/business casual
  - **Remember, members of the public, media, and industry will be present**
  - **Present yourself professionally**

UNIVERSITY OF CALGARY

FINAL REPORT

Objective

- Comprehensive report that covers all the details of the project
- Click here for full instructions on this report
  - Final Design Report

UNIVERSITY OF CALGARY

PEER EVALUATION

Conducting Peer Evaluations

- Two peer evaluations in the course
  - Fall term: feedback only, no grade impact
  - Winter term: average numerical score used as the percentage grade
- **All students must complete both evaluations**
- Conducted through ITP Metrics
- Focus on professional qualities, not personal issues
- Each team member evaluates others and self on:
  - Communication with team members
  - Knowledge, skills, and abilities
  - Commitment to the team's work
  - Emphasizing high standards
  - Keeping the team on track

Proficiency Evaluation

- Subjective criteria
  - Outstanding (5)
  - Strong (4)
  - Moderate (3)
  - Bare minimum (2)
  - Unsatisfactory (1)
- Member will also receive written feedback
- System will assign an overall numerical average grade
  - Students with an average **score below 4 must follow up**
  - Follow-Up Processes
